

Press Release For Immediate Release

A Successful Clean-Up and Recycle SA Week 2022!

Cape Town, 21 September 2022. South Africans can celebrate another successful Clean-Up and Recycle Week (12-17 September 2022) as thousands of kilogrammes of waste were removed from our natural spaces this past week.

According to Douw Steyn, Sustainability Director at Plastics SA, literally hundreds of clean-up events took place around South Africa in an effort to keep our environment clean, with many more initiatives continuing to take place over the coming weeks.

“Clean-Up and Recycle Week 2022 was action-packed and it was wonderful to see the large number of volunteers signing up for clean-ups at beaches, rivers and streams and in communities around the country. Our sincere gratitude goes out to all the coordinators who worked tirelessly to ensure that everything runs smoothly on the day, the many sponsors who contributed finances or products to this year’s clean-up efforts and to every South African who freely and willingly gave their time and energy to make a difference by removing visible litter from the environment,” he said.

Highlights of this year’s Clean-Up & Recycle SA Week included River Clean-Up Day, which took place on Wednesday, 14 September, National Recycling Day which took place on Friday, 16 September, and the International Coastal Clean-Up and World Clean-up Days both falling on Saturday, 17 September. These incredible days united over 180 countries across the world for a cleaner planet as volunteers and organisations took to cleaning every space imaginable - including divers who went deep-sea plastic hunting!

Douw especially thanked Plastics SA’s Sustainability Manager, John Kieser, who has been the Cape Provinces coordinator and one of the founder members of the South African International Coastal Clean-Up for the past 27 years.

Plastics SA’s work is not finished yet, as all the completed audit sheets now need to be compiled, processed and analysed to produce a final report about South Africa’s participation in this year’s events as well as a snap-shot of the waste found on our beaches and waterways.

“We want to encourage communities to not stop their efforts to keep their communities clean. Every South African can make a difference every day by picking up litter and ensuring that they recycle. Small, consistent efforts make a huge difference if everybody does it. Together we can turn the tide on litter in our country!” Douw concludes.
